Opening of CLEXTRAL Pacific Pty Ltd

PROXIMITY with customers is a strategic priority for CLEXTRAL. With its head office in France and a strong presence across four continents, CLEXTRAL is now taking its technology across boundaries to the fifth continent of Oceania, where the number of CLEXTRAL extrusion equipment per capita is one of the highest in the world.

Traditional applications of the technologies supplied by the company are: snacks, breakfast cereals, pet food, fish feed, as well as innovative applications related to twin screw lines and pasta forming and drying, which are particularly developed in this continent. CLEXTRAL has already been working on R&D programs in Australia in collaboration with its customers, particularly specializing in the highly innovative field of extrusion porosification.

Emmanuel Perroton is in charge of the new subsidiary. His 20-years of experience at CLEXTRAL and his multi-tasking profile will assure the customers of a service with high standards of competence and reactivity. The subsidiary's resources will also be focusing on customer services in Asia, bringing additional competence and availability.

Leading its international team with its headquarters in France, CLEXTRAL has establishments in eight countries (France, United States, China, Chile, Algeria, Russia, Denmark, Australia...) to closely accompany its ever growing family of customers from all over the globe.
